

Dear parent(s)

This week we were informed by the municipality that works (concrete repairs) in the Affligemsestraat (at the Kleemputtenstraat) are planned between **21 September 2020** and **16 October 2020**. On which date the works will start exactly, the contractor will communicate.

This means that during the works access to the Kleemputtenstraat from the Affligemsestraat for car traffic is not possible.

On the next page you can consult a plan of what the traffic situation will look like at that moment.

Concrete:

- The Kleemputtenstraat will **not** be accessible from the Affligemsestraat.
- On the **Affligemsestraat** traffic **lights** will be used to control through traffic.
- The **Kleemputtenstraat** is still **accessible via the Molenstraat**. This is **only for exceptional local traffic**. Try to avoid that many cars drive into the Kleemputtenstraat and get stuck.
- We ask parents to take your children to school as much as possible by bike or on foot. If you do come by car, you can always park in the Colruyt car park and walk to the school entrance on foot.
- The **entrance along the Molenstraat** (new building side) **remains accessible**. You can also use this road to drop off your children.

For questions about these works I refer you to the mobility department of the municipality of Liedekerke. You can contact them on 053 64 55 28 or 1770 kenneth.deman@liedekerke.be.

Thank you in advance for your understanding.

Kind regards

Stanny De Block
